

# HEALTH SYSTEMS

## WHAT ARE THEY?

### What is a good health system?

Well functioning health systems are the **precondition** for realizing Universal Health Coverage, and, as part of it, sexual and reproductive health and rights. This is the only **sustainable solution**.

### OUR AIM IS TO REALIZE UNIVERSAL HEALTH COVERAGE (UHC)

This means that all people, worldwide, have **access to health services** that they need, **where** and **when** they need them

### IF THE HEALTH SYSTEM IS STRONG

MATERNAL AND INFANT MORTALITY RATES ARE **LOW** ↓

PEOPLE HAVE **LONG** LIFE EXPECTANCY

PEOPLE LIVE **HEALTHY** LIVES
